BA08 Mid Range System

AUTO POWER-SAVING MODE

The product enters power-save mode if the control is idle for 30 minutes and no user is detected by the sensor. Once in power-save mode, the water and seat temperature is set to 'low', and the LED on the main area is switched off.

NOZZLE POSITION

The nozzle position can be adjusted as desired by the user.

ERGONOMIC SEAT

The ergonomic design allows comfort for extended use.

SEAT LOCK MODE

If the sensor does not detect a user through the seating sensor, the rear cleansing, front cleansing, air drier, and auto cleansing features are locked from operation.

TWIN NOZZLES

The anal cleansing nozzle and female bidet nozzle are separated for a more hygienic operation.

REMOTE CONTROL

The remote control will notify you of the status of operations via buzzer.

MOVE

Select the 'move' function during rear or front cleansing to toggle the nozzle forward or backward for a more thorough cleansing.

AUTO-CLEANSING

With a single touch, the user can conveniently run the 'rear cleansing' and 'air drier' features.

ENGINEERED FOR YOUR SAFETY

The product is engineered for safe use in wet environments.

SELF-CLEANING NOZZLE

After the rear or front cleansing is complete, the nozzle is automatically sprayed with cleansing water for 5 seconds to maintain nozzle cleanliness.

MUTE MODE

When this mode is selected, the keys operate silently.
- This is not the initial setting.
The default setting uses a buzzer to notify the user of the status.

SELF-TESTING

The LED on the main body flashes when a problem occurs, while setting off the buzzer to alert the user.

NOZZLE CLEANING

The nozzle is extended to its maximum length for cleaning.

With Coway's advanced technology, the bidet can adjust the cleaning water stream to 3 distinct, precise levels.

For your convenience

the Coway Bidet automatically cleans the entire nozzle before and after each use!

World's first oval-shaped water stream

is designed to fit the body's natural contours, and thereby create a more refreshing experience.

Front cleansing

3 Level of flow width control

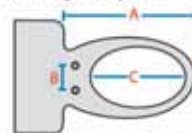

The user can control and adjust the width of the cleansing water stream from gentle to strong, for more thorough cleansing.

Rear cleansing
